GETTING A MOBILITY DEVICE THROUGH INSURANCE

Resources for living

IN SHORT...

Mobility devices can be covered by insurance in certain cases but requires a visit to the doctor, a prescription, sometimes a therapy visit and no device ordered within the past 5 years. It can take 2-3 months to get the device. But it is worth it to go through insurance for custom devices. If you need that we can refer you!

HOW TO CONNECT

Find a Medicare approved supplier in your local area by using this [Locator Tool](#). This providers also take various private insurance and Medicare Advantage plans.

WHY THIS WORKS

If you want to try to get a manual wheelchair, scooter or power wheelchair through insurance follow these steps:

1. Schedule an in person visit with the physician or nurse practitioner - they'll need to write a prescription and put their approval in their notes.
2. Connect with a wheelchair provider in your area that accepts your insurance. Use the Medicare Supplier Directory to help.
3. They will help you the rest of the way by scheduling a wheelchair evaluation, collecting paperwork and getting it sent to the insurance provider for approval. Finally they will provide the chair and maintenance for the next 5 years.
